Experience Counts!

In 1958, Dean Pump's pH Series was the benchmark used in developing the ANSI/ASME B73.1 process pump standard. The pumps continue to meet and exceed all ANSI standards for the chemical processing industry. Dean Pump's pH Series centrifugal process pumps are designed to insure long, continuous service life at low cost.

Dean pumps are manufactured in our state-of-the-art facility in Indianapolis, Indiana. A choice of ductile iron or 316SS construction, coupled with multiple seal design types, allows us to quickly custom build your pH pump to suit virtually any process application.

Our ready to ship factory inventory, along with a network of factory-trained and authorized distributors, allows us to offer you a **48-hour commitment on pH pump shipments, with NO PREMIUM!** This commitment, and our outstanding technical support, enables us to respond to your process pump needs with the utmost urgency.

PERFORMANCE

pH SERIES PUMPS

pH Series ANSI Design Chemical Process Pumps

- Capacities to 1,100 GPM (250 m³/hr)
- Heads to 560 feet (170 m)
- Pumping temperatures to 500°F (260°C)
- Working pressures to 275 PSIG (1,896 kPa)
- Twenty-two sizes

pH Series pumps are built to ANSI/ASME B73.1 dimensions. Twenty-two sizes are available in ductile iron or 316SS.

Markets/Applications

- Chemical
- Petrochemical
- Pulp and Paper
- Mining
- Pharmaceutical
- Food Processing
- Semiconductor
- Water Treatment
- Power Generation
